Description of Problem or Suggestion:

When the time comes to develop the format of the advertising service, it is strongly suggested that the USWG be included in the process since this group has knowledge about the users and about the data and they are the most likely group to be maintaining this service.

Originator's Recommendation

ECS/USWG telecons.
ECS input at USWG meetings, etc.

HAIS Response Date 6/30/95

Agreed. USWG will be included in the process to develop the format of the advertising service. In the near term, May 31-June 1, Prototype Workshop 1 will include representatives of the USWG to explore issues such as advertisement of the initial services that will actually be provided. One of the advertising concepts to be discussed is whether the search for advertising keywords should be supported through metadata or by searching through the text of abstracts.
